PROFESSIONAL SUMMARY

Graduated from McGill University with a double major in Computer Science and Political Science, now pursuing a role in the Video Game Industry. Six years of programming experience in languages such as Python, Java, C#, C++ and one year of experience with the Unity Game Engine. Currently studying at the Independent Video Game Design Program (IVGD) at Dawson College.

EDUCATION

Double Major in Computer Science and Political Science | 2024
McGill University, Montreal, QC, Canada
Bachelor of Arts and Science

Independent Video Game Design | 2027
Dawson College, Montreal, QC, Canada
Attestation of Collegial Studies

RELEVANT EXPERIENCE

Gigi's Gone Missing... Again – https://github.com/darcyMaz/Gigis_Gone_Missing..._Again

Unity Game Engine, C#, Teamwork, Storytelling, Game Design, Public Speaking

- Built a 2D Action/Adventure prototype from scratch in the Unity Game Engine.
- Programmed the entire game from character movement, to dialogue, to scene and audio management.
- Worked in a two-person team to complete this project within a one-month deadline.
- Conceived of an interesting puzzle involving the translation of pager codes to written English.

Mendacity – <https://github.com/EmilM358/AwesomeHorrorGame>

Unity Game Engine, C#

- Built a 3D Grotesque Horror Game in a team of three in the Unity Game Engine.
- Programmed a flask mixing puzzle and the management of the game, both using the Singleton design pattern.
- Worked in a team of three to complete this PSX style horror game prototype in 3 ½ weeks.

Personal Website – <https://www.darcymazloun.com>

React, JavaScript, TailwindCSS, Linux, Bash, Nginx, Selfhosting

- Created a portfolio website with React, TailwindCSS, and JavaScript.
- Self hosted this website on a local Linux server using Nginx.

Peer Tutoring – Dawson Student Learning Centre – Reference Available

Unity Game Engine, C#, Communication

- Tutored Scripting 1 and Scripting 2 to classmates while studying these courses at the same time.
- Exhibits ability to concurrently learn programming concepts and convey them to others.
- Demonstrates advanced knowledge in programming concepts.

Random Maze Generator and Builder – <https://github.com/darcyMaz/Maze-Generator>

Unity Game Engine, C#, 3D Modelling (Autodesk Maya and Substance Painter)

- Implemented a Random Depth-First Search Algorithm to build unique square mazes of a desired size.
- Mazes are generated and then built in Unity at run-time.
- 3D Modelled tiles for the maze which can be used as demo models for those wishing to reuse this project.
